STOCK PRICES WENT TO SMASH IN AN EARLY RUSH TO SELL. FOR ONE PURCHASER FICTITIOUS RATES.

Tennessee Coal and Iron Dropped 21 Points, Rallying to 91.

RAILWAYS WERE FIRM. \$

Scene on 'Change the Mosti-Exciting Since the Last Bull Movement.

Wall Street, Dec. 11. The industrial shares and the local trac tion stocks were again subjected to presnot only from professional traders. but from the heavy liquidation which small speculators were compelled to make. From he moment of opening there was heavy selling in practically every part of the mar-ket. The scene on the floor was the most exciting of any day since the culmination of the last buil movement. Strangely enough the rallway stocks which should have been most adversely affected by the British reverse in South Africa, as many of these securities have an international narket, held comparatively firm. The socalled "pool" stocks, which certain cliques of insiders have attempted to manipulate

of insiders have attempted to manipulate upward, were the heaviest losers.

Early declines were the most pronounced in American Sugar Brooklyn Rapid Transic, American Tobacco, Metropoitan, Colorado Fuel, American Tin Plate and Tennessee Coal & Iron. The latter stock opened 3½ lover, at 100½ holding fairly steady during the first few minutes, and then started downward at 1 to 2 points drop at a time, touching its low price-at 33, a net decline of 21 points. In common with the balance of the market, there was a rally, which brought it back to 91. Sugar dropped to 132, ralled just before the close to 159%, closing with a net gain of 1½, at

The state of the control of the cont

Weak Holders Cleaned Out.

the market, the liquidation of weak holders must have been very compiete. Following an old established maxim in speculation that a move in either direction culminates in one particularly heavy day the transactions of more than one million shares yesterday might reasonably be supposed to be a turning point in the market. Money was very high and showed little sign of relaxation. Europe needs gold and can get it only from this country. Further purchase of bonds by the Treasury would undoubtedly send gold abroad at once, but the enormous surplus gold which is locked up in the Treasury should be released for use in the ordinary channels of trade. Exports of the yellow metal will be simply loans which would in time be repaid.
